

## North Thurston Public Schools, District No. 2

*Nonpartisan*

### **Thomas Bowen**

My wife and I are passionate about learning and routinely interact with teachers and administrators at Timberline, where all 3 of our children attend school. I genuinely desire to serve this community and all of its students, providing vision, setting challenging goals and measuring outcomes. I present the district with a fresh look at and approach to education, stimulating creativity, intellectual freedom, original thought and possibilities both within our students as well as our professional educators. Our students need critical thinking and solid problem solving skills, as well as the ability to logically convey their thoughts and ideas in writing and speaking. Our graduates must contribute to the betterment of America, developing a sense of responsibility, accountability and service while in public school. I recently retired from the US Army and currently help generate the next Stryker Brigade on Fort Lewis. At West Point, I served on our school board.

I am seeking another term on the School Board in order to continue the work we have begun to better align the district's curriculum at all grade levels with the state's high academic standards.

I was the president of the Board when it decided to move forward with a multi-year plan to improve student academic achievement, and help teachers continuously improve the quality of their instruction.

Continuing this work is crucial since this year's high school sophomores are the first class to be held to the state's high academic standards for graduation. I want all of our students to get a well-rounded education, and be prepared to graduate and move on to college or work. And as we progress, the district must continue to be open to the public's input and earn its support.

Please support me as we work together for the children of our community.

## Teachers • Principals • Club Leaders

Did you know that the Thurston County Auditor's Office, Elections Division has educational materials available for students at all grade levels? We also have a speaker's panel available to come and talk to students and clubs about the importance of voting. We can even conduct a classroom, school, or club election where children vote using the same materials their parents use!

Give us a call at [\(360\)786-5408](tel:3607865408), and ask to speak to [Gwen Cornelius](#), our Voter Outreach Coordinator
