

County Level Data Online

DASIE Series  Data for Assessment, Surveillance, Indicators, and Evaluation

Overview

The ability to publish information on the Internet has dramatically reduced the cost of providing data, increased timely access to data, and increased the amount of data available to the public. This publication was developed to help direct individuals who are interested in data to reliable county level sources.

Accessing Data Online

Accessing data from the Internet often requires that you be able to view (download) files from a website, which means that you may need the following types of software on your computer: Adobe Acrobat Reader for PDF files, Microsoft Word, or Microsoft Excel. Adobe Acrobat is the most commonly used software for files on the Internet and is available at no cost online at www.adobe.com/products/acrobat/readstep2.html

Internet sites move or delete web pages and reports periodically. If a link listed on this sheet does not work or if you have problems accessing the data, please contact Mary Ann O'Garro at the Thurston County Public Health & Social Services Department, 360-867-2525 or ogarrom@co.thurston.wa.us
