Food Establishment Application

The attached packet contains information to assist with the process of starting or remodeling a food establishment in Thurston County. Please review all the information carefully before starting your project. There are a series of steps required to build or remodel a food establishment.

The process is as follows:

- Check with the Planning Department in your jurisdiction to see if your project is zoned for your business.

- If your facility will be utilizing a septic system for disposal of waste water please complete the Food Establishment On-Site Septic System Supplemental Form and submit it with the completed application.

- Submit scaled plans, specifications for equipment, menu and application to the Thurston County Environmental Health Division for review and approval. Be sure all questions are answered on the attached checklist (page 5). There is a $190.00 submittal fee due with all plan reviews received by this office.

- Receive a plan approval letter from the Thurston County Environmental Health Division before starting construction.

- Schedule a pre-opening inspection of the completed facility at least 5 days before the scheduled opening of the business. All conditions indicated in the approval letter must be met during the pre-opening inspection.

- Pay all plan review, pre-opening inspection and food establishment operating permit fees prior to opening.

- As you prepare your plans remember your attention to detail will assist staff in completing the review and help to reduce your costs. The current fee for a plan review is $190.00 per hour. The plans will become a permanent record in your food establishment file. Any changes or additions of equipment or menu will require further review.

A plan review is required under the following circumstances:

- When a food establishment is newly constructed;
- When an existing structure is converted for use as a food establishment;
- When an existing food establishment undergoes an extensive remodel or repair;
- When you purchase or take over an existing establishment and make changes that will require remodel or repair; or
- When an establishment changes from one type of operation to another.

Application Assistance Offered

We do provide a free 30 minute consultation with a plan reviewer to answer questions about the application packet and your proposed food establishment. You will need to call ahead to schedule an appointment.
Frequently Asked Questions

What is a plan review?
A plan review is the process by which we ensure that your plans and equipment meet the state and local health requirements before you begin construction of your project. By communicating with you early in your endeavor, we hope to prevent costly mistakes, while ensuring that your food service establishment is built in compliance with the minimum standards and in the best interest of the public’s health. The process of opening, remodeling or repairing a food service establishment may also require the approval of other departments such as the Department of Labor and Industries, the Liquor Control Board, and local building, planning, and fire departments.

How much time does it take?
- About 10 business days for initial review of application
- About 10-20+ business days to complete plan review and receive plan approval letter
- About 5 days prior notice to schedule a pre-opening inspection once construction is complete

Our goal is to have an initial response to complete applications within 10 business days. The time it takes to get final plan approval may be several more weeks, based on the number and type of items that need to be clarified or altered, and the speed in which you are able to reply back with sufficient information or changes.

How much does it cost?
- Initial application review fee $190 (non-refundable)
- Hourly fee for plan review $190/hr (2-4 additional review hours is typical)
- Permit fees $140-$1,620/year depending on type and size of establishment
- Typical cost $1,525 for a small restaurant (4 hrs review + $745 permit)
- All plan review and permit fees must be paid before you will be allowed to open

Can my home kitchen be licensed as a Retail Food Establishment?
No, home kitchens cannot qualify for a Food Service Operation Permit from the Thurston County Environmental Health Division.

What if the Thurston County Environmental Health Division (TCEHD) requires plan revisions?
The applicant will be notified in writing if revisions are required. Revised plans indicating all of the required changes must be submitted to TCEHD for additional review.

What will happen if I revise my plans after the original plans have been approved?
Plan resubmittal is required if changes are made after TCEHD has approved the original plans. An additional plan review fee will be assessed for this service. Failing to resubmit plans when changes have been made, after original plan approval, will delay final approval for the facility.

How will I be notified of my project status?
A letter will be sent to the applicant indicating approval, disapproval, or a need for additional plan review information.

Can I open for business immediately after construction is completed?
A preoperational inspection is required before the food establishment may open. Call at least seven days in advance to schedule this inspection to help avoid delays in opening. You may also need to obtain final approvals from other city, county and state agencies as required.

What will the inspector look for during the preoperational inspection?
1. The inspector will be ensuring the following items have been satisfactorily completed:
2. The facility was constructed as indicated on the last set of TCEHD approved plans;
3. The facility has obtained final approval for all other applicable agencies, such as the Department of Labor and Industries, the Liquor Control Board and the local building, planning, and fire departments;
4. The utilities such as water, gas, electric and wastewater disposal are provided; and
5. All equipment is in working order.

I have completed everything listed so far in this outline. Now can I open for business?
All plan review and permit fees must be paid before you will be allowed to open Once you have passed your final pre-operational inspection from TCEHD, paid for and received your food permit, and received approval for occupancy from other permitting entities such as the fire department, building department, etc., then you are ready to begin serving your first customers.

What if I am purchasing or taking over a current establishment?
Please contact the Thurston County Environmental Health Division to receive the proper forms, new application or permit transfer, in order to obtain a Food Service Operating Permit for the new business.

Food Preparation Information

Please check the boxes that apply to how potentially hazardous foods are prepared and served in the establishment.

- To order only
- In advance and discarded at end of day
- Using time as a public health control
- Potentially hazardous foods are prepared in advance with two or more of the following steps: cooking, cooling, reheating, hot or cold holding, freezing or thawing.
- Potentially hazardous foods are prepared for delivery to and consumption at off premise location.
- Foods prepared and served to a highly susceptible population (elderly and young children).
- Only non-potentially hazardous foods prepared.
- Raw produce prepared and/or meats received frozen

The undersigned attests to the accuracy of the information provided in this application. The applicant agrees to comply with Chapter 246-215 Washington Administrative Code Food Service and Article II Rules & Regulations of the Thurston County Board of Health Governing Food Service and allow the regulatory authority access to the establishment as per the code requirements.

Food Establishment Checklist

As you prepare your submittal please remember your attention to detail will expedite the processing of your proposal and thus help to reduce the costs for plan review. Below is a detailed outline of the information our office will need to complete our review. Please answer each question and submit this checklist with your application.

Note: This information is a guideline to assist you in preparing your plans for review. You will be responsible for meeting all the requirements of the Washington Administrative Code 246-215, Article II - Rules and Regulations of the Thurston County Board of Health governing Food Service, the Uniform Building, Plumbing, Mechanical, and Fire Codes.

1. Have you submitted proof of adequate water service and sewer (utility bill showing service address)?  Yes   No
   If the establishment is served by a septic system, have you submitted a Septic Addendum form (available from our website: www.co.thurston.wa.us/health/ehfood)?  Yes   No

2. Have you filled out the application form completely?  Yes   No

3. Have you submitted a menu?  Yes   No

4. Did you describe the preparation process for each menu item? See attached examples # 1 & 2.  Yes   No

5. Have you prepared a scaled drawing (indicate scale) showing the entire establishment and all existing and proposed new equipment and facilities? These plans do not have to be professionally drawn. See attached example # 3.  Yes   No

6. Have you provided copies of specification sheets and/or equipment model numbers for all equipment? All equipment must be NSF (National Sanitation Foundation) approved or its equivalent. See attached example # 4 and fill out attached Equipment List form.  Yes   No

7. All equipment/cabinets should be permanently attached to floors/walls, if not, they should be easily moved for cleaning. If the equipment/cabinets are permanently attached, there should be a gap of at least 6" between the floor and the bottom shelf or between equipment and floor - OR - the equipment/cabinets should be flush with the floor and coved for easy cleaning. Does your equipment/cabinetry meet these requirements?  Yes   No

8. Have you provided sneeze guards for food service lines, buffet, self service and salad bars?  Yes   No   N/A

9. Surfaces of walls, floors, ceilings counters, shelving and equipment throughout the establishment must be smooth, non-absorbent, durable and easily cleanable. Have you included a finish schedule (list of types surface materials used i.e. formica, tile, enamel paint, stainless steel) with the plans? See example #5.  Yes   No

10. All floor-wall junctures and permanent equipment floor junctures must be coved. Contact your local building department for requirements. Are all floor-wall junctures coved?  Yes   No

11. Are all wood and concrete surfaces sealed?  Yes   No

12. Have you submitted a plumbing schedule, listing a kitchen fixtures and indicate which have direct or indirect drains (ie., air gap)? See example # 4.  Yes   No

13. Handwashing sinks must be provided in all food preparation and service areas. More than one may be required. Do you have handwashing sinks available in these areas? See attached example # 6.  Yes   No

14. Handwashing instructional signs are required at each handwashing sink. Will signs or posters be provided? See attached example # 7.  Yes   No

15. Dish/utensil washing sinks and dishwashers in all food preparation/service areas including liquor service areas must be large enough to wash, rinse and sanitize all utensils, dishes and cookware used in the establishment. A three compartment sink in addition to a dishwasher is required when using utensils, dishes or cookware too large for the dishwasher. Dishwashing machines must be NSF approved. A pre-rinse sink is required for dishwashers. Does your dishwashing set up meet these requirements? See attached example # 8.  Yes   No
16. Do you have drainboards on both sides of dishwashing sinks and dishwasher?  □ Yes  □ No
17. Is a utility/mop sink provided inside the facility?  □ Yes  □ No  □ N/A
18. A food preparation sink may be required. You cannot use the three compartment, mop or handwashing sink for food preparation. More than one food preparation sink may be required. Do you have the necessary food preparation sinks? See attached example # 6.  □ Yes  □ No  □ N/A
19. Have you provided indirect drains for food preparation sinks, ice machines, condensate from refrigeration units and any unit used to dispense food or beverages? See attached example # 9.  □ Yes  □ No  □ N/A
20. Have you provided vacuum breakers on all faucets with threaded hose bibs? (Specific plumbing questions should be directed to your local building department.) □ Yes  □ No  □ N/A
21. Have you provided employee restrooms which meet local building department standards? (Contact local building department for standards.) □ Yes  □ No
22. Public restrooms must be available if your foods will be provided for on-site consumption. Have you provided public restrooms? □ Yes  □ No  □ N/A
23. Do the restrooms have handwashing sinks equipped with hot and cold water and are they provided with soap and single service towel dispensers or air hand drying devices? □ Yes  □ No
24. Are the restroom doors self closing? □ Yes  □ No
25. All food, utensil and single service item storage must be a minimum of 6" above the floor and no storage can be under sewer and water lines. A separate storage area must be provided for chemicals such as cleaners, lubricants, pest control materials and other poisonous, toxic items. Does your storage facility meet these requirements? □ Yes  □ No
26. Have you indicated the proposed exhaust ventilation system on the plans? Contact your local building department for requirements. Exhaust hoods may be required. □ Yes  □ No
27. Are filters and grease extracting equipment easily removable for cleaning? □ Yes  □ No  □ N/A
28. Do you have provisions for the exclusion of insects and rodents (screens, self-closing doors, down draft fans, weather stripping, etc.)? □ Yes  □ No
29. Lighting must be adequate in all food preparation, service, storage, restroom and equipment and utensil washing areas. All lights in food preparation, service and storage areas, and dishwashing areas must be shielded. Does your lighting meet these requirements? □ Yes  □ No
30. Are all electrical boxes flush mounted with no exposed conduit, wiring or duct work? □ Yes  □ No
31. Have you indicated a refuse storage location with an area for container and equipment washing on your plans? You must also fill out the attached Waste Disposal Form. □ Yes  □ No
32. The refuse area must be provided with a concrete or machine laid slab. A screen or fencing around the refuse area is recommended. Waste water generated at the garbage storage area must be drained into a sanitary sewer or an approved on-site sewage system. Waste water must not enter the storm sewers. Does your refuse area meet all these requirements? □ Yes  □ No  □ N/A

The above information is true and correct to the best of my knowledge.

Example Product Flow Chart

1. Raw Frozen Chicken
2. Chicken thawed in refrigerator / walk-in cooler
3. Trim chicken and rinse in food preparation sink
4. Hot hold at steam table at 140°F or above
5. Grill chicken to 165°F or above
6. Marinate in buckets in walk-in cooler
7. Serve
   - Left-over chicken cooled in two-inch depth metal pan in walk-in cooler
8. Cold hold left-over chicken in walk-in cooler at 41°F or below
9. Left-over cold chicken re-heated to +165°F and served to customers
Description of Food Preparation Process

Please refer to the examples below of how to complete the information on food preparation process.

Examples:

♦ Teriyaki Chicken with Salad

30 pounds of raw chicken delivered frozen 3 times a week → Chicken thawed in refrigerator on bottom shelf → Once thawed, chicken is trimmed (process takes approximately 30 minutes) and rinsed in food preparation sink → Marinated in bucket in refrigerator → Cooked on grill to 165°F (temperature is taken using a stem thermometer) → Hot held in steam table at 140°F or higher → Chicken order is grilled quickly prior to serving → Leftover chicken is transferred to a shallow two-inch depth metal pan, level of food not exceeding two inches, uncovered and immediately refrigerated to 41°F or below → Per order, leftover chicken is taken from the refrigerator and reheated on the grill to 165°F and served until fresh product is needed.

4 boxes of lettuce delivered 3 times a week → The lettuce is stored in the refrigerator on top shelf → Food preparation sink is cleaned and sanitized → Lettuce is rinsed in food preparation sink (gloves worn) → Lettuce is then cut on sanitized cutting board (gloves worn) → Stored in plastic bins in refrigerator on top shelf → Per order, lettuce is dispensed with tongs to serving plate → Served with packaged dressing.

♦ Cheeseburger

40 pounds of beef patties are delivered twice a week. Product is transferred and stored in walk-in cooler on the bottom shelf at 41°F or below. Small quantities of hamburger patties are transferred to refrigerated drawer located under grill. Per order, hamburger patty is retrieved from drawer with metal tongs and placed on grill. While hamburger is cooking, hamburger buns are toasted (gloves worn). Once the patty has reached a cooking temperature of 155°F or higher (checked with thermometer), cheese is added and melted. Beef patty is then placed on the bun and condiments are added (ketchup, mustard, shredded lettuce, tomatoes and onions). Product is wrapped and served.
**EQUIPMENT SCHEDULE**

1. Mop Sink
2. Hot Water Heater
3. 3 Compartment Pot and Pan Wash Sink
4. Dishwasher with Pre-Rinse Sink
5. Hand Sink
6. Water Fill Station
7. Sandwich Preparation Refrigerator
8. Reach-in Refrigerator
9. Ice Machine
10. Food Preparation Sink
11. Work Counter with Slicer
12. Walk-in Refrigerator
13. Walk-in Freezer
14. Garbage Area

**FINISH SCHEDULE**

**Floor**
- Kitchen: Vinyl Comp Tile with Base Coving
- Restroom: Vinyl Comp Tile with Base Coving
- Dining: Low Fill Carpet
- Garbage: Sealed Concrete

**Wall**
- Kitchen: Gypsum Board
- Cook Line: Stainless Steel
- Dishwash: Gypsum Green Board with FRP* BD**
- Restroom: Gypsum Board with FRP* BD**
- Dining: Gypsum Board with Enamel Paint

**Ceiling**
- Kitchen: Gypsum Board with Enamel Paint
- Dining: Suspended with Acoustical Tile
- Restroom: Suspended with Acoustical Tile

* FRP - Fiber Reinforced Plastic
** BD - Board

### Examples of Plumbing Fixtures Requiring Indirect Drain

- Food preparation sinks
- Warewashing sinks and dishwashers
- Refrigerators and freezers including walk-in refrigerators
- Ice machines and ice storage bins
- Steam tables and kettles
- Dipper wells
- Espresso machines and fountain beverage machines
- Any other equipment which holds food and requires a drain.

**NOTE:** For actual requirements please check with your local building department for the most current plumbing regulations.
**Finish Schedule**

The following table provides examples of some of the acceptable finish materials for floors, walls and ceilings by area. Note that this is not an all-inclusive list; after being reviewed finish materials not included in this table may also be acceptable.

<table>
<thead>
<tr>
<th>AREA</th>
