

Section 3.1.2.2 Nutrient Totten Inlet DEIS

Nitrogen inputs

- |                                     |               |
|-------------------------------------|---------------|
| 1) stream and watershed input       | 47,450 kg/yr. |
| 2) <u>average</u> septic tank input | 17,958 kg/yr. |
| 3) atmospheric N inputs             | 1,100 kg/yr.  |
|                                     | <hr/>         |
| total                               | 66,508 kg/yr. |

Farm mussel reduction 4549 kg/yr

6.8% reduction
