

# 2022 RESIDENTIAL BUILDING PERMIT FEE GUIDE

Community Planning & Economic Development, Building Development Center  
(Resolution #14958 effective January 1, 2014)

## RESIDENTIAL BUILDING PERMIT FEES

- Residential fees are based on valuation. The square footage of the structure is used to determine the valuation. Multiple the square footage by the applicable fee to determine the valuation then refer to the attached fee chart for building permit and plan review fees.
- Additional fees may apply when review by other County departments is required. These fees are in addition to the building permit fees and cover an allotted hours of review time. An hourly billing invoice will be generated if staff exceed the allotted hours. Hourly fees must be paid prior to permit issuance. Refer to Building Site Review fees below.
- Residential projects may be subject to impact fees for parks, schools, and transportation. Additional information and impact fee schedule are located online at [https://www.co.thurston.wa.us/permitting/impact/impact\\_home.html](https://www.co.thurston.wa.us/permitting/impact/impact_home.html).
